Summary

Aspiring Data Analyst with a solid foundation in Excel, SQL, and data visualization. I enjoy working with data to uncover patterns, build dashboards, and turn insights into meaningful decisions. Currently expanding my skills in Python and Power BI to strengthen my analytical capabilities.

Skills

Data Analysis & Visualization: MS Excel (Pivot Tables, Charts), Power BI

Database & Querying: SQL Queries, Joins, Data Extraction

Programming: Python (Pandas, NumPy), Java, OOPS

Data Concepts: Data Analysis, Data Visualization, Data Cleaning, Problem Solving, Statistical Analysis

Tools & Technologies: Git, GitHub, MS Office

Projects

Car Theft Analysis Dashboard 📁, Excel 03/2025 – 04/2025
Developed an interactive dashboard using MS Excel to analyze car theft data across different locations and time periods. Cleaned and structured raw datasets, applied pivot tables and charts to identify patterns and trends, and generated insights to support data-driven decision-making.

COVID-19 Data Analysis, PowerBI/Excel 06/2025 – 07/2025
Analyzed COVID-19 dataset to identify trends in cases, deaths, and vaccinations across multiple countries. Performed data cleaning and created visualizations to uncover patterns, enabling better understanding of pandemic progression.

Professional Experience

FNEXT, Junior Data Analyst 01/2026 – 02/2026 | Remote
Worked on analyzing structured data to identify patterns and support application features. Performed data cleaning and preprocessing to improve data quality and consistency. Created basic reports and visualizations using Excel to track key metrics and trends. Collaborated with team members to understand requirements and deliver data-driven insights for better decision-making.

Education

KGiSL Institute of Technology, B.E CSE (CGPA:8) 06/2022 – 04/2026 | Coimbatore
Sri Kumaran Matriculation Higher Secondary School, HSC 04/2021 – 06/2022 | Chengapalli

Certificates

Deloitte Australia-Data Analytics: 📁 PowerBI
Data Visualization with Python: 📁 Python(Pandas)
